COURSE IN HOSPITAL

: Mrs. Shail Dubey 62 years, old known case of bilateral osteoarthritis knee Right more than Left. She was admitted with complaints of right knee pain. She doesn't have any history of chronic illness. On admission she was conscious, alert responding to verbal commands. Her B.P.- 120/80 mm of Hg, Pulse- 88/min, Respiratory rate- 20/min, SpO2-100% at room air., RBS-135 mg/dl. On systemic examination no abnormality was detected. Routine Investigations were sent , which were under normal limits. Patient was posted for total knee replacement after a protocol based pre medical and pre anaesthesia checkup. Left Total Knee Replacement was done on 1/12/2021 under Epidural analgesia . was managed with I/V fluids, I/v antibiotics, I/V PPI , multimodal analgesia through epidural cath. Post operative period was uneventful and is therefore being discharged in stable condition.

CONDITION ON  
DISCHARGE

: Better

TREATMENT ADVISED

: **T. Xolid 600 mg 1 BD X 10 DAYS(Twice a day after food)**  
**T. Wilcy 250 mg 1 OD X 10 Days (Twice a day after food)**  
**T. Ultracet 1 OD X 10 Days**  
**T. Dompan 40mg 1 OD X 10 Days**

Patient Name : Mrs. SHAIL DUBEY

Admission No : IP2112002

Referred By : WALK-IN

**Limb Physiotherapy as advised**

FOLLOWUP AND REVIEW  
DATE
